

Thank you for your interests.

We commend you for being a leader in firefighter safety and thank you for taking the time to read this letter. The Last Chance Rescue Filter® is a vital tool that will equip you to perform a self-rescue in an out-of-air emergency. When purchasing a Last Chance Rescue Filter® as an out-of-pocket expense, Essex offers a Trainer FREE for 60 days. We want to ensure that you are carrying your Last Chance Rescue Filter® with confidence.

When purchasing your Last Chance Rescue Filter®, add “Free 60-Day Trainer” to the order and you will receive one (1) Last Chance Rescue Filter® and one (1) Last Chance Trainer along with a training DVD. The Trainer is FREE for 60-days, giving you time to train while minimizing your out-of-pocket expense. It is then up to you to feel comfortable with the donning process, understand the filters use and limitations and be prepared.

We recommend the following.

1. First watch the DVD included in this package and read the “Operators Instructions.”
2. Place the Trainer in the yellow Trainer Pouch and place this inside the black Outer Protective Cover (from your Last Chance Rescue Filter®), oriented as your moisture resistant barrier pouch is now.
3. While in full gear and wearing the Trainer on your gear, go through the donning process several times in full light until you are comfortable.
4. Next go through the process several times in a dark simulated emergency situation.
5. Repeat this training at least once a week, more if necessary.
6. Share with your department!

The Free Trainer must be returned after 60 days from receipt of the order or purchased (\$118/each). Return instructions are as follows:

1. Pack the Trainer Filter and yellow Trainer Pouch in the original box.
2. Affix the return label included with your shipment. Your label includes your order number which is what we need to have record of your return.
3. Ship/Mail any convenient way.

We hope that you never get into an emergency situation where you are out of air, but we are thankful that you are taking steps to prepare yourself. Again, thank you for being a leader in firefighter safety. Do not hesitate to contact me at any time.

Best regards and be safe,

Mycalene Berkbuegler
